

The Government of the Republic of Trinidad and Tobago
MINISTRY OF EDUCATION

Trinidad and Tobago to host 2nd Virtual Educa Caribbean Symposium 2014

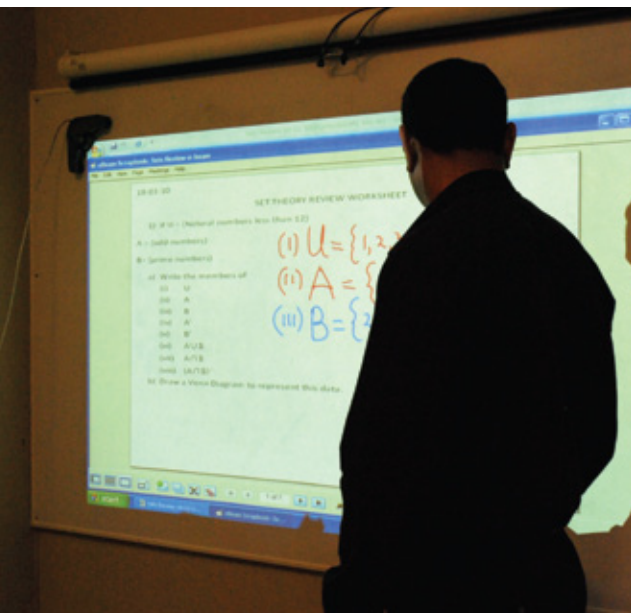

Technology Driven Learning Environments

As a leader in the use of ICT in education, Trinidad and Tobago is well poised and prepared as the government continues its drive to deliver quality Education in order to meet the demands of the twenty first century and beyond.

Having outfitted our Primary and Secondary schools with computer labs, Wi-Fi access and ICT supported environments, the government of Trinidad and Tobago has proven its commitment to the infusion of ICT in education through the delivery of over 70,000 laptops to every form 1 student entering secondary school, almost 3700 laptops to Teachers, primary and secondary school Principals as well as School Supervisors, facilitating the implementation of ICT on all levels, integrating every facet of Education in order to deliver a standard of Education that is holistic and of the highest quality.

Virtual Educa is a multilateral initiative addressing Education, innovation, Competitiveness and Development. For the last decade, Virtual Educa has been instrumental in putting together programs in support of these topics, mainly in Latin America and the Caribbean. The Virtual Educa Caribbean conference will contribute to the goal of making 21st century instruments available to youths and educators.

The second conference – Virtual Educa Caribbean 2014 – will be held from May 19 to May 20, 2014 at the Hyatt Regency Hotel, Port of Spain. The event will take place concurrently with a Caricom and Latin American Meeting of Ministers of Education organised by the host country, the Republic of Trinidad and Tobago.
